

Docket No. 2360-0359P

REMARKS

The specification has been amended to provide a cross-reference to the previously filed International Application.

The claims have been amended to remove improper multiple dependencies.

Entry of the above amendments is earnestly solicited. An early and favorable first action on the merits is earnestly solicited.

If necessary, the Commissioner is hereby authorized in this, concurrent, and future replies, to charge payment or credit any overpayment to Deposit Account No. 02-2448 for any additional fees required under 37 C.F.R. § 1.16 or under 37 C.F.R. § 1.17; particularly, extension of time fees.

Respectfully submitted,

BIRCH, STEWART, KOLASCH & BIRCH, LLP

Attachment: VERSION WITH MARKINGS TO SHOW CHANGES MADE

(Rev. 02/21/02)

Docket No. 2360-0359P

VERSION WITH MARKINGS TO SHOW CHANGES MADE

The specification has been amended to provide a cross-reference to the previously filed International Application.

IN THE CLAIMS:

The claims have been amended as follows:

4. (Amended) The method as claimed in [one of claims 1 to 3] claim 1, characterized in that, for each module, at least one event table is generated in that a search is made in the database for predetermined protocol parameter values identifying a particular event or for combinations of protocol parameter values and the corresponding records are wholly or partially stored in the event tables.

7. (Amended) The method as claimed in [one of claims 1 to 6] claim 1, characterized in that the system quality value is calculated with respect to a grouping criterion by a scalar multiplication of a module quality vector, the components of which are the module quality values of the individual modules, by a module weighting vector, the module weighting vector being dependent on the grouping criterion.

8. (Amended) The method as claimed in [one of claims 1 to 7] claim 1, characterized in that the system quality values are displayed graphically, particularly as a histogram.

Docket No. 2360-0359P

9. (Amended) The method as claimed in [one of claims 3 to 8] claim 3, characterized in that the system quality values are correlated with one another with respect to various grouping criteria.

10. (Amended) The method as claimed in [one of claims 2 to 9] claim 2, characterized in that at least a speech quality, a duration for establishing the test connection and location, time, speed and direction of movement of the mobile terminal are acquired as external system protocol parameters.
